DETAILED ACTION

Drawings

The drawings were received on January 13, 2004. These drawings are acceptable.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Sandhu et al. (US Pat. 5,108,943, hereinafter Sandhu).

In regards to claim 1, Figures 10-12 of Sandhu disclose a semiconductor device comprising: a capacitor formed above a semiconductor substrate 20 and including a straight cylindrical shaped storage electrode 103 having a cylindrical projection 101/102, an edge 101 of the cylindrical projection being located on an uppermost part of the cylindrical-shaped storage electrode, a capacitor dielectric film 121 formed on the storage electrode, and a plate electrode 122 formed on the capacitor dielectric film, the edge 101 of the cylindrical projection being rounded and having a larger thickness than a thickness in a remaining portion of the cylindrical projection. Sandhu discloses the storage electrode 103 has a mushroom shape (col. 5, lines 1-9). Therefore, the storage electrode is cylindrical.

Application/Control Number: 10/020,951

Art Unit: 2815

In regards to claim 7, Figure 12 of Sandhu discloses a border portion between a side surface and a bottom surface of the cylindrical-shaped storage electrode 103 (the electrode on the left side) is rounded.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 9 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sandhu in view of Nam et al. (US Pat. 6,380,579 B1, hereinafter Nam).

In regards to claim 9 and 11, the difference between Sandhu and the claimed invention is the storage electrode being formed of a metal film. Figure 4 of Ham discloses a capacitor with a storage electrode (33a,29a) formed of platinum (column 6, lines 53-55). In view of such teaching, it would have been obvious to the ordinary artisan at the time the invention was made to modify the invention of Sandhu by forming the storage electrode from a metal film. The ordinary artisan would have been motivated to modify Sandhu in the manner described above for the purpose using a conductive material that is resistant to oxidation.

Art Unit: 2815

Allowable Subject Matter

Claims 2-4, 8, 10, and 12 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments with respect to claims 1-4 and 7-12 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Application/Control Number: 10/020,951

Art Unit: 2815

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Matthew C. Landau whose telephone number is (571) 272-1731.

The examiner can normally be reached from 8:30 AM - 5:30 PM. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tom Thomas can be reached on (571) 272-1664. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9306 for regular communications and (703) 872-9306 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0956.
